

Tasks for your

Interactive Webinar “IDEA vs. Excel”

Dear Participant of Our IDEA Interactive Webinar,

To make this webinar engaging and a lot of fun for all of our attendees (and for us, of course), we would like to give you the chance to participate actively with us! And we recommend you to use 2 screens when the webinar is active.

In preparation for the webinar, we encourage you to attempt the following tasks, using an analysis tool of your choice. We have prepared 9 tasks of varying difficulty levels for you. Please use the attached Excel datasets as the basis.

Please don't invest more than 60 minutes of your precious time. And if you're faster than that, that's great: please write down the time it took you to find the right answers.

Have fun!

3 simple questions:

Your answers:

1. Are there any negative amounts? If yes: How many?
2. What is the most frequently occurring item?
3. Have any bookings been entered in Saturday? If yes: How many?

3 questions of intermediate difficulty:

4. If there are multiple invoice numbers with the same amount: how many?
5. If there are entries in the master data with identical bank account (field: “IBAN”) and registered identical phone number: how many?
6. What is the ID of the business partner (PARTNER NUMBER) who is responsible for the highest total amount?

3 more difficult questions:

7. How many business partners in the master data are on the blacklist?
8. The document numbers should be sequential; how many gaps are there? (Note: The numbers are in ascending order in steps of 100.)
9. In which city have business partners most frequently exceeded credit limits?

FINALLY:

If you were faster than 60 minutes, how many minutes did it take you?

_____ min.

Finally: No need to send the answers to us, just have the document ready at the webinar.
